2C-B / 2C-T-7

What is 2C-B / 2C-T-7?

These are psychoactive or hallucinogenic compounds similar to mescaline. Chemically, 2C-B is 4-bromo-2, 5-dimethoxyphenethylamine. 2C-T-7 is 2,5-dimethoxy-4-(n)-propylthiophenethylamine. Because they are produced in clandestine laboratories, they are seldom pure and the amount in a capsule or tablet is likely to vary considerably.

What are the street names/slang terms for 2C-B / 2C-T-7?

7th heaven, 7-up, Beautiful, Blue Mystic, Lucky 7, Nexus, Tripstasy.

What does it look like?

Both are sold in powder or in pill form.
